As well as new weapons that you can see and find in some of the most popular anime series on the planet. It's truly amazing the things that can be done in Minecraft when a competent modder makes it his mission to create something good. This answered my question pretty fast. And even though the mod is still a work in progress, eventually you should be able to use the magical powers of TES and cast them upon mobs. Lots of crossovers in this list, huh? Check Out This Mod As the name suggests, you will be entering a world filled with many objects and ores unique to the game. But this mod doesn't come with any crazy assault rifles, sadly. It's up to you to craft your ideal weapon and use it in battle. Check Out This Mod If you're an Overwatch fan, let me stop you right there. Create new battle items using glowstone or make axes out of magma. It's a complete and vanilla-like overhaul of the item log, but with tons of new features to keep you busy for weeks. So I put my creativity to the test and scoured the web to find some fantastic weapon mods to enhance your experience as a mob-slayer. You'll be able to slay mobs as if they were soldiers. The creators of the mod say that this is the best weapons mod in the community. Oh, boy, you've found your match. And when I say custom guns, I really mean it. Each type of sword crafted with this modpack also deals different types of damage, and some of the pickaxes are able to mine faster than others. Darn too! This is a good time! You'll be able to craft them really easily and use them however you want. Enter the war and avoid getting yourself killed while firing a whole new set of weapons; all of which can be operated including the ones that belong to the aliens. For example, you could pick up a diamond sword and combine it with other materials to make it stronger. And let's be sure you'll grow to enjoy this mod as quickly as I did. world and discover new ores, craft weapons, and enjoy the stuff you never thought could bring anime into Minecraft. So you'll need another mod if you want more high-tech stuff. This mod adds a whole bunch of tanks and war vehicles, and you'll be able to ride them to war (or to use them against zombies). This mod basically adds Call of Duty weapons to Minecraft. Ranging from SMGs to powerful missile launchers, this will make you think that Minecraft is an actual warzone. Come out victorious in a blaze of glory and honor the name of Soap McTavish. Minecraft and RPGs, can life get better? You'll be able to create different sets that each come with various durability points. And be sure to use as much firepower as possible! You won't want those pesky spiders coming back for revenge. Just a shame that projects like this seem to end up abandoned when they were on the verge of greatness! But hey, at least we get to enjoy the beta version. Only, with Minecraft. Check Out This Mod Now this mod adds a whole set of new weapons and tools to the game, all of which are based upon elements found in vanilla Minecraft. You'll be able to play against mobs or simply kill other players in MP servers, all while gunning for victory, victory.
